

transpire

A vibrant rainbow arches across a cloudy sky, with rain falling from the clouds. The word "transpire" is written in large, bold, blue letters across the top of the image. The background is a bright, sunny day with white clouds and a clear blue sky. The rain is depicted as vertical lines falling from the clouds. The overall scene is bright and colorful, suggesting a fresh, clean atmosphere.

FIELD
Solar rays, focused within 300,000km of parabolic troughs, heat synthetic oil to very high temperatures.

MOAT
A by-product of the desalination cycle, concentrated brine cascades down terraces and creates a surreal multi-hued crystalline field around sealed acacia planters.

SPIRES
One hundred counter-balanced stainless steel spires line the adjacent expressway and vent condensing steam as part of the desalination cycle.

GROVE
A grove of one thousand acacias in sealed planter beds is irrigated by 300,000 liters/day of potable water produced entirely on-site by the desalination cycle.

POWER
Heat exchange infrastructure, including underground molten salt reservoirs, turbine generators, and desalination system.
